Claims 1-11 are currently pending.

Claims 1-11 are generic to a plurality of disclosed patentably distinct species comprising the specific process variables as set forth on pages 3-4 of the specification. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

The disclosed species are considered patentably distinct in that they are not so closely related that a prior art reference anticipating the claims with respect to one set of variables would render the claims obvious (35 U.S.C. 103) with respect to the other process variables.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).
